

What it measures

This RT-PCR kit determines presence or absence of RNA from SARS-CoV-2, the virus that causes COVID-19.

Collection method

RT-PCR lower nasal swab for easy and painless collection.

Turnaround time

Results are available 24-48 business hours after the sample is processed at the lab.

Sensitivity, Specificity

The FDA believes a minimum of 95% positive (sensitivity) and negative agreement (specificity) is acceptable clinical performance. The COVID-19 Test Home Collection Kit that Everlywell offers meets the FDA diagnostic performance criteria.

Why it matters

COVID-19 is a worldwide pandemic. With COVID-19 diagnostic testing, people who test positive and have symptoms can get care earlier. Contacts of those individuals can be traced and self-isolation or quarantine started sooner to help stop the spread of the virus.

A test you can count on

Simple to launch, we do the heavy lifting

Results available 24-48 business hours after sample is processed at the lab

Accurate and reliable, meeting all FDA requirements for sensitivity

Digital results that you can sort, filter and search

Who should take this test

This test is recommended for individuals who fall within any of the below criteria:

- Have symptoms of COVID-19
- Had close contact (within 6 feet for a total of 15 minutes or more) with someone with confirmed COVID-19
- Been asked or referred to get testing by their healthcare provider, local or state health department

Symptoms that could be related to an active COVID-19 infection

Not everyone displays symptoms, but they can range from mild symptoms to severe illness and may appear 2-14 days after exposure to the virus.

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

How it works for you and your participants

Kit is distributed to your participant on the Everlywell platform

Participant registers the kit at everlywell.com/register

Participant collects their sample, using simple step-by-step instructions

You and the participant are provided with updates on the shipment and processing of the kit

You and the participant are both alerted of test results

Participant is given actionable next steps by a physician, when appropriate

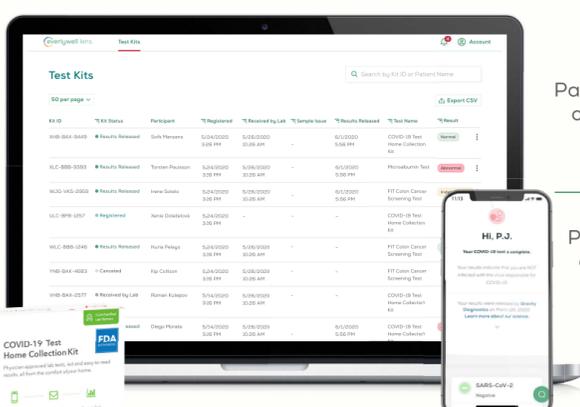

Included with this kit

THE COMPLETE END-TO-END SOLUTION

As test results become available, organizations can view them in Everlywell Lens.

Organizations can sort, filter and search results.

In-app notifications alert organizations real-time of positive results.

Participants receive text or email notifications when their results become available.

Participants can keep and download their results.
